

The Renewable Energy Task Force
Will Hold its February Zoom Meeting on February 22, at 7 PM

The Agenda:

Rob Wills, Chairman, will report on his conversation with the Select Board regarding the RETF's request to have a plot of town land saved for the potential installation of a 25 kW solar array that would provide the necessary power to cover the electricity needs of all of the town's municipal buildings. The land, in question, was recommended by the Chairman of the Temple Land Use Committee, Tim Fiske and is located behind the TES ball field. Of course, the potential installation would come after securing viable financial assistance, Select Board approval, public hearing acceptance and citizen approval of a Warrant Article at Town Meeting.

If the Select Board approved the request to have that site reserved, the Task Force will then discuss and lay out our next steps.

Thom and Rob will report on the actions of NH's present legislature regarding the previously approved legislation (2019) providing the opportunity for NH towns and cities to establish Community Power Plans to give their towns more local control and cost savings through bulk purchasing and demand response.
