

The Renewable Energy Task Force
Will Meet Remotely on Monday, March 29 at 7 PM

The Agenda:

Tom Whitcomb will read the proposed letter that the Task Force voted for him to write requesting an approval from the Select Board and Land Use Committee to reserve sufficient space (at least 100 ft by 30 ft) in the vicinity of the TES ballfield for a 25kW solar installation when its funding becomes available and its approval at a Town Meeting is confirmed.

We will then vote on whether to approve the letter or make changes and decide whether a member of the Task Force should attend a meeting of the Select Board to present the request.

Rob Wills will present more information based on his consultation with Eversource regarding the location and installation requirements of a potential solar array in the area we are asking the BOS to reserve.

Tom and Rob will bring the committee updates on the possible impacts of hearings and legislation taking place in our NH Legislature regarding Net Metering renewable power installations and Community Power Planning. This will most likely lead to a discussion of the issues at stake for our committee's mission and efforts.
