

Approved Meeting Notes for Renewable Energy Task Force meeting on February 24, 2020.

The Task Force met at the Municipal Building and FD at 5:30 PM for a solar site visit with Greg Blake, solar installer, prior to our monthly meeting.

Attending were Rob Wills, Deb Delseo, Vince Mamone, Bev Edwards and Laura Lynch joined by Ken Caisse, BOS Chair, and Greg Blake.

Following the site visit, we met with Mr. Blake at the Annex where he reported his observations and recommendations regarding the viability of a ground mounted solar installation near the Municipal Building, along with his evaluation of a potential solar roof mount based on a previous site visit at the Fire Department.

After his departure, the Task Force approved the meeting notes from the previous meeting.

We then opened a discussion of the solar options being considered.

Bev Edwards then reported on a conversation she had with Dori Drachman from Peterborough regarding the possibility of Temple joining in, at some point, with a Community Power plan that Ms. Drachman is in the midst of organizing.

Peterborough is planning a several year process of constructing a multi-town CP plan to which Temple would be welcome, once its operational structure has been completed.

The meeting was adjourned at 8:35 PM.

Respectfully submitted by Bev Edwards
